

# What if Nelson created Cohousing Communities?

William Samuels - Architect

Bronwen Newton - Cohousing Developer

**How do we currently develop housing in  
New Zealand?**

Berryfields

Berryfields subdivision in Richmond / greenfield development

# What are some of the challenges with our current approach?

Expense - housing crisis

Suburban sprawl

Car oriented 'doughnut cities'

High environmental impact

Lack of community

Social disconnection / alienation

Lack of housing diversity to cater for:

- The elderly
- Young professionals
- Multigenerational families

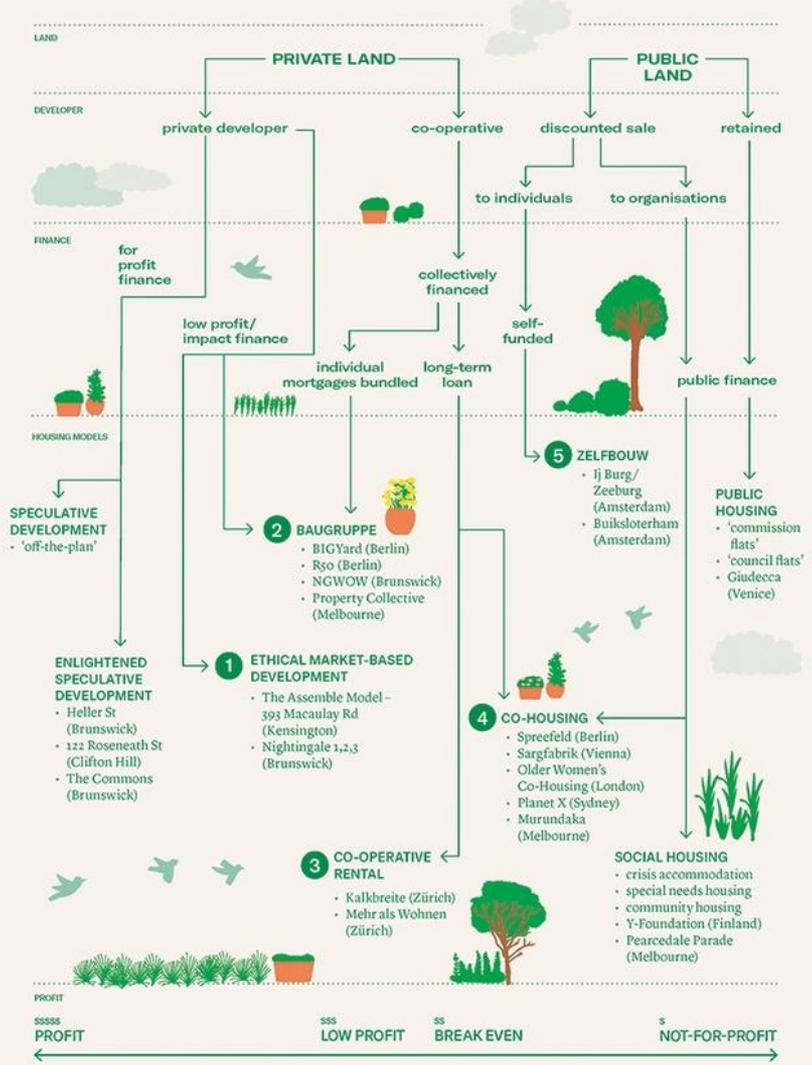

...anyone wanting something other than the quarter acre lifestyle

Plan Change 29  
Nelson

**What are some alternative approaches to housing?**

# REDESIGNING THE HOUSING MARKET

# Housing spectrum

Market  
housing

Apartments

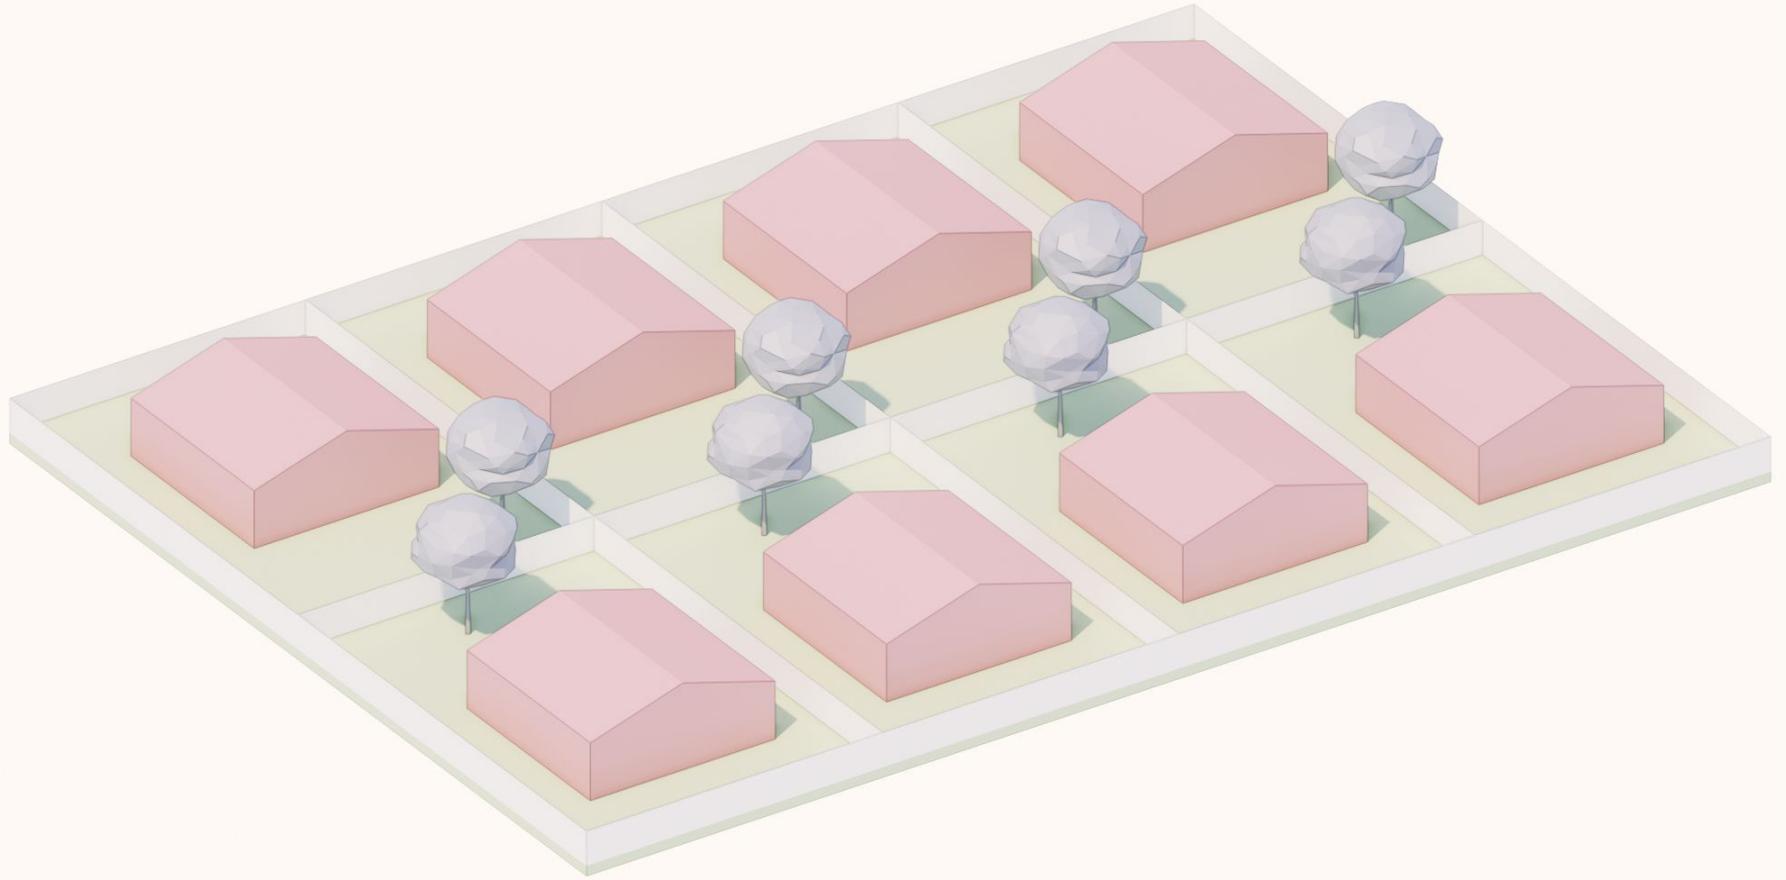

Cohousing &  
housing co-ops

Public/social  
housing

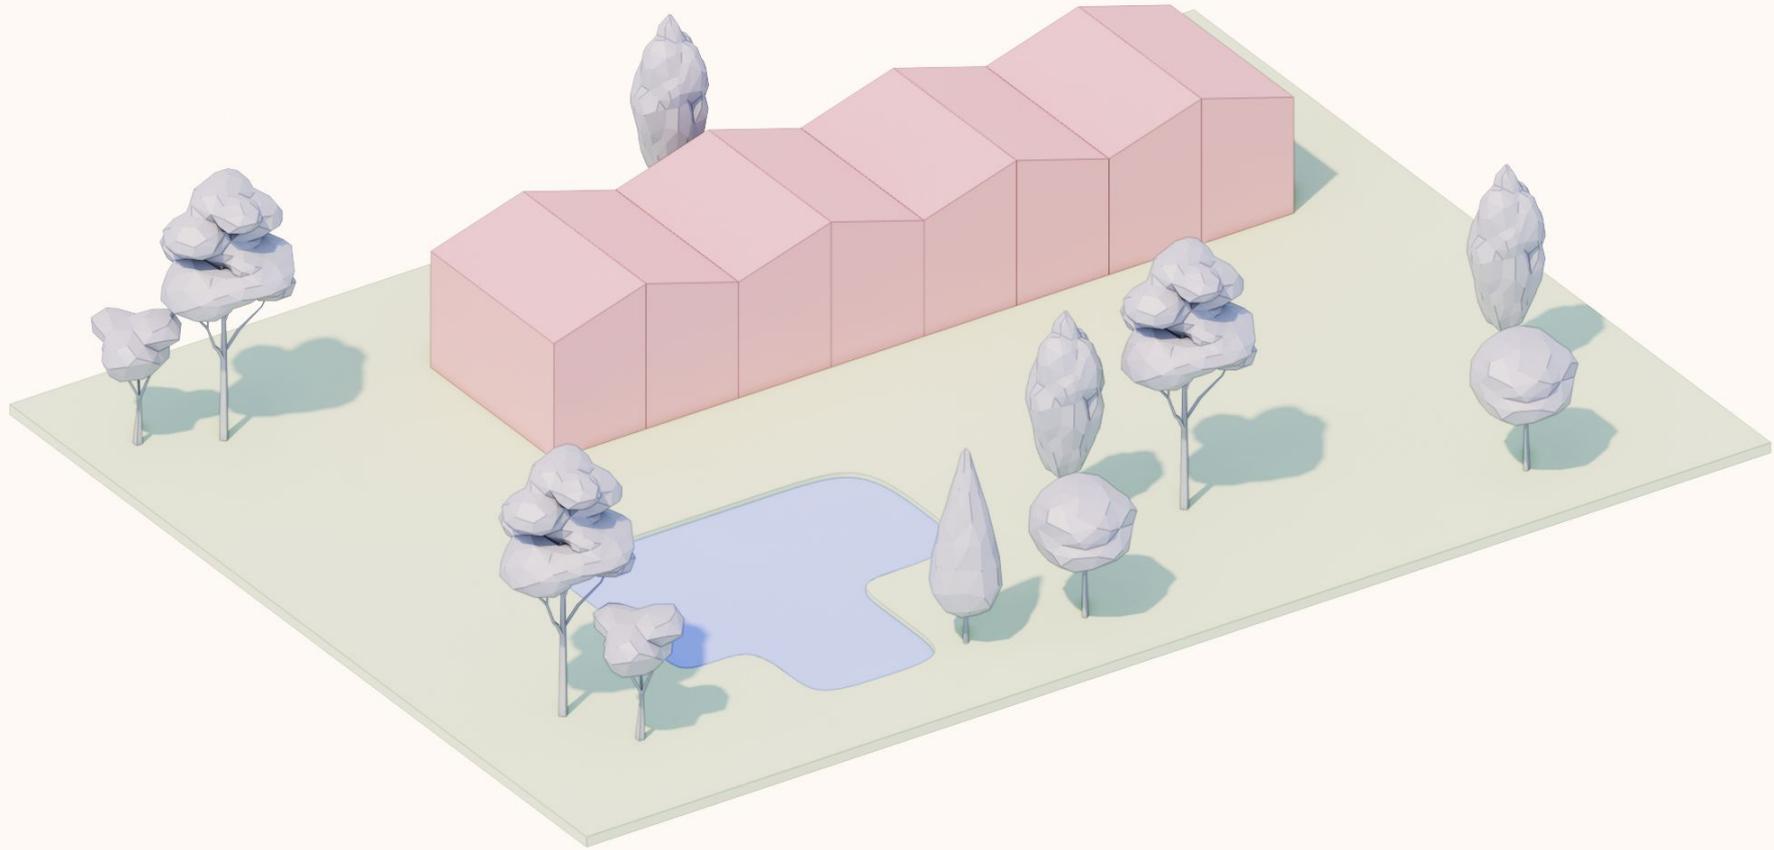

What is cohousing?

**An intentional community of private  
homes clustered around shared spaces**

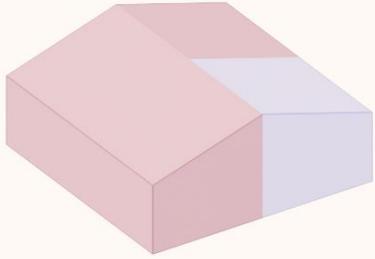

**Traditional housing development**

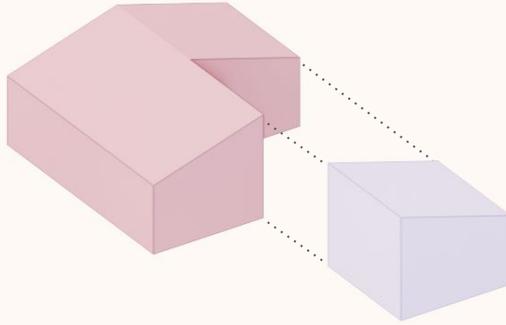

Cohousing development

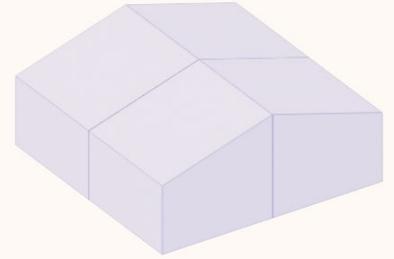

- **Dwellings are individual and self-contained**
- **Common spaces & recreational areas**
- **Shared amenities, such as:**
  - **Gardens**
  - **Services**
  - **Storage**
  - **Guest facilities**

**Traditional house**

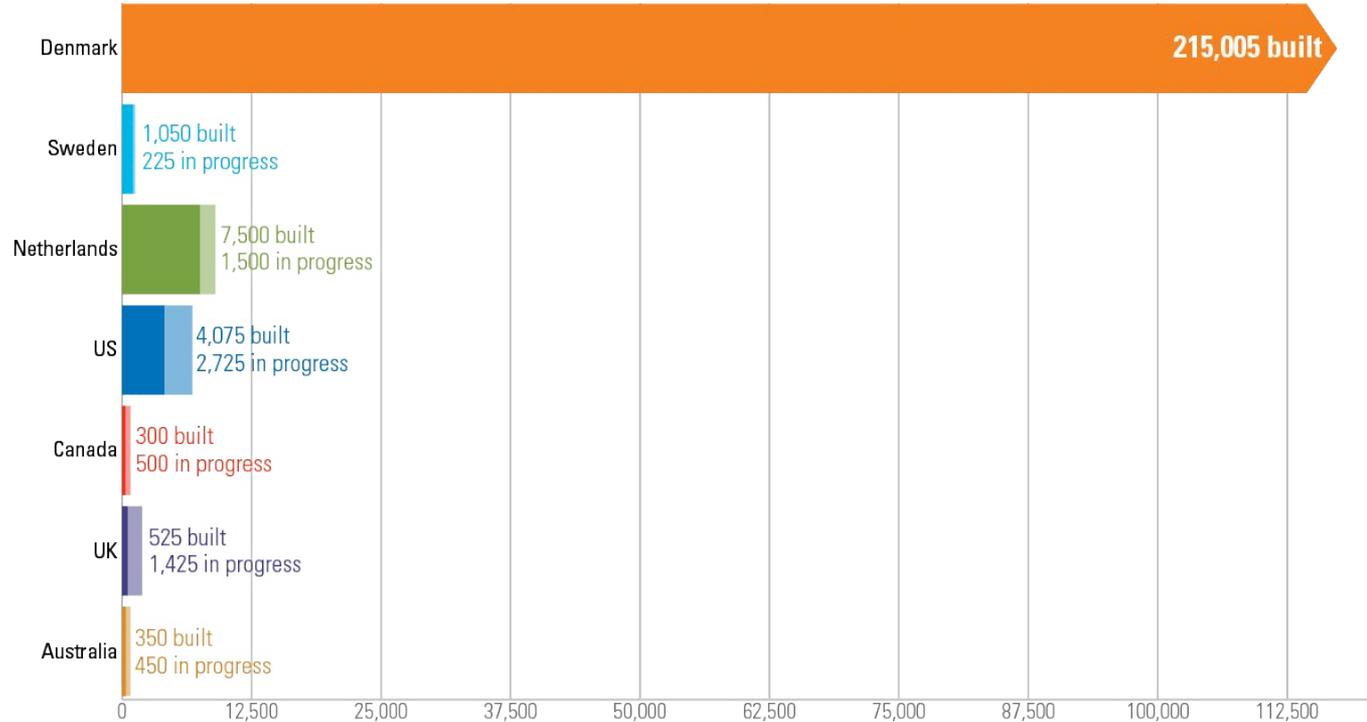

**Secondary spaces**

**Common facilities**

# Cohousing began in Denmark in 1960s and is an increasingly popular form of housing throughout the world

## **Cohousing principles vary, but typically contain:**

- Participatory process**
- Neighbourhood design**
- Common facilities**
- Resident management**
- Consensus decision-making**
- Neighbour support network**

# Benefits

- Community
- Amenity
- Environmental
- Affordability

**Resident led & developer led cohousing**

Urban Habitat Collective  
Wellington

- **Everyone has a unique sweet spot for the balance between community and privacy.**
- **Building community is not the same as making friends.**
- **Pets - the metaphor for cohousing.**

# Takaka Cohousing Neighbourhood

A Cohousing project within a Community Land Trust

# Our Purpose

Te Hapori Hauora provides regenerative solutions for the Mōhua bio-region through modelling sustainable living solutions, land regeneration, purpose driven enterprise and education.

# Long term impacts

## Social

Increase wellbeing, connection, sharing and resilience.

## Housing

Create more “at cost”, beautiful, high performing homes.

## Biodiversity

Forest regeneration and green space planting encourages birds and insects

## Water Management

More green space and less hard surface helps manage flood risk.

## Food Production

Organic, local food production increases resilience and knowledge.

## Te Tiriti Partner

Respect and incorporate Mātauranga Māori

**What could cohousing look like in  
Nelson?**
